

# Guide to Google Meet for Students

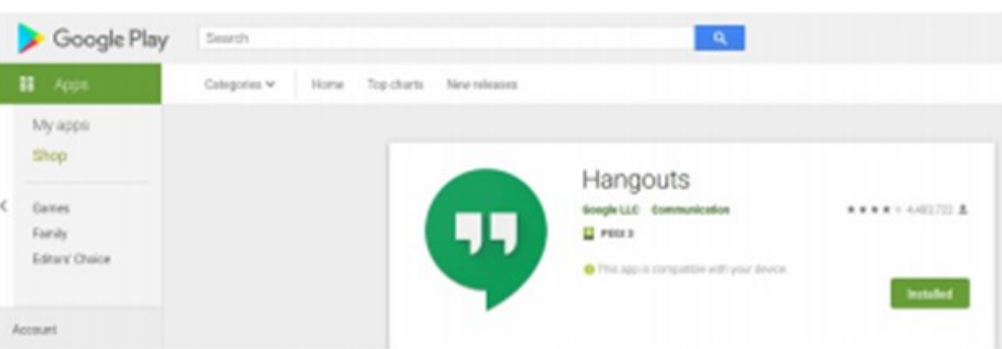

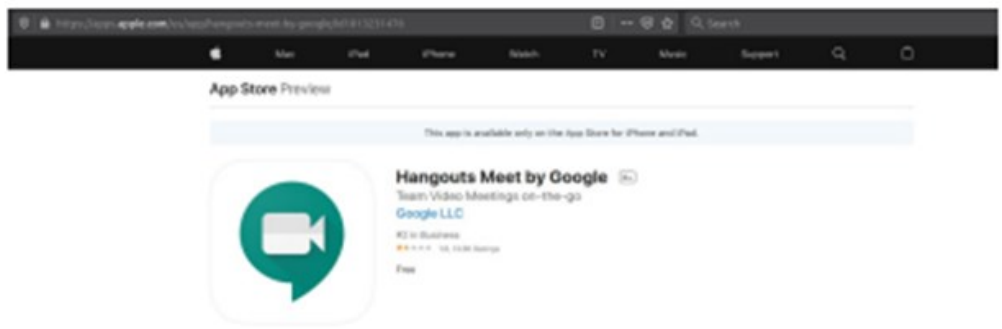

Talking to staff in person is very important for home learning, and working with other students is good for your progress and well-being.

We are going to do this using **Google Meet (Part of Google Hangouts)**, as you already have an account for it – it is the same as using Google Classroom.

Here is Google Meet accessed online through Google Classroom or via this link:

<https://meet.google.com/>

You can also download the app for your phone or your tablet.

Your phone may have a better microphone than your PC!

The app is available for iOS and Android.

YOU MUST SIGN IN WITH YOUR NORTHIAM C OF E USER NAME

ie johnb@northiam.school

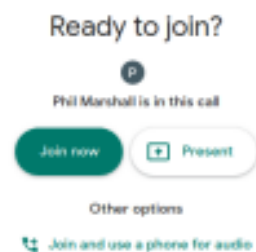

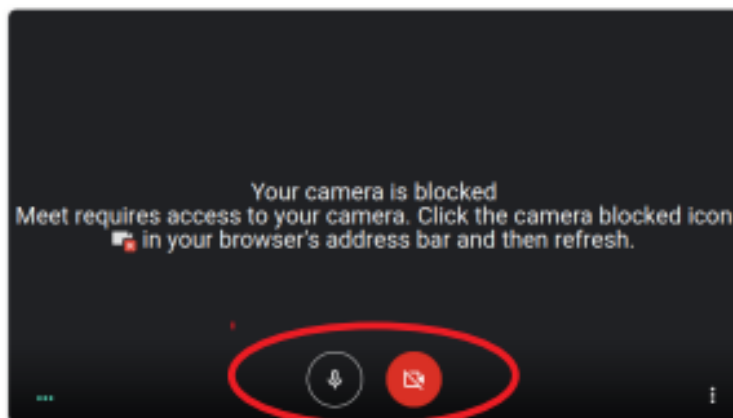

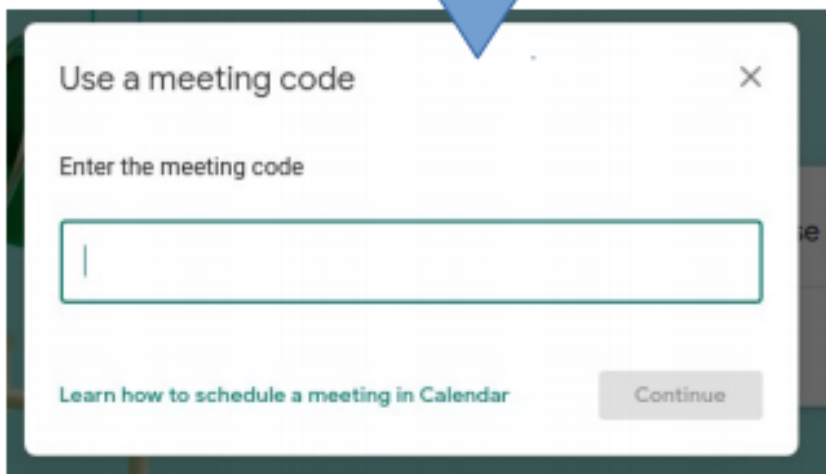

THE SAME AS GOOGLE CLASSROOM OR LOG ON TO GOOGLE CLASSROOM AND GO THROUGH LINK ON CLASS PAGE.

To join a meeting, enter the code sent by your teacher.

**Do not share the code with anyone else!**

You can also access the meeting directly from the link in a Google Classroom

Your teacher will tell you whether to join using your camera or **audio only**.

Click the camera and microphone icons to turn them on or off.

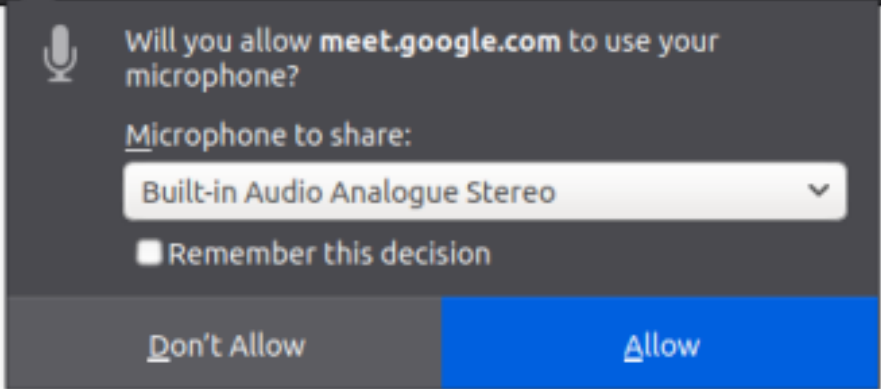

If your Internet is slow, audio only may be better anyway.

The sound may be better if you use a headset.

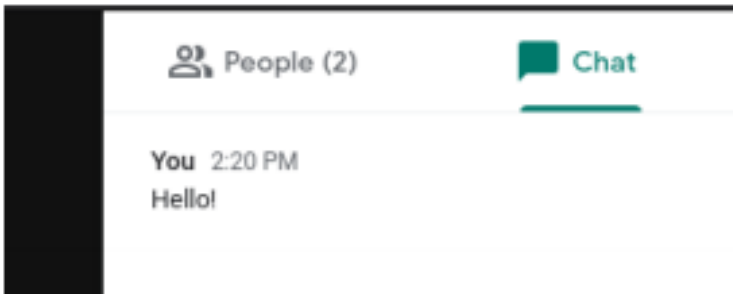

On your PC, there may be audio and video settings in your browser.

Check these if people can't hear you.

Click on your screen, or swipe up from bottom of the screen to see the camera and microphone options.

If you are not talking, **mute your microphone**. This prevents echoes for other people.

Give people time to speak – there is a delay between what people say and what you hear.

**Use the chat** if you are not getting your turn to speak.
